1. Online at www.csi-dot.com – click on “I-DOT™ Registration”
2. Follow onscreen instructions

INTRODUCTION

The I-DOT™ system is an extremely effective theft deterrent that will help you protect your property and, if stolen, help the police recover it for you. Please read this booklet thoroughly to obtain full benefits.

The reason that the I-DOT™ System is so effective is that unlike some far more expensive theft systems, it firstly acts as a **THEFT-DETERRENT** - and everybody knows that prevention is better than the cure.

WHAT IS THE I-DOT™ SYSTEM?

Your I-DOT™ dispenser contains approximately 1000 microdots, each one about the size of a pinhead, enabling you to place tiny security markings all over your property. Each I-DOT™ is laser etched with a unique personal identification number (PIN) which you register in your name. A “Toll Free Traceline” number is accessible and used by the police if your property is stolen or recovered to positively identify your asset. Just visible to the naked eye, the I-DOT™ can only be read through a magnifying viewer.

HOW IS THE I-DOT™ SYSTEM SO EFFECTIVE?

The success of the I-DOT™ system lies in the huge number of I-DOT™ microdots used to mark up your valuable household contents and in the “secret” places they can be hidden. A thief knows that it will be virtually impossible to find and remove all the I-DOT™ microdots. The police know that they only have to find one I-DOT™ to identify you as the owner and prove the thief has stolen your property. The highly visible warning labels provided will act as a powerful deterrent to would be criminals.

HOW THE TRACELINE SYSTEM WORKS

The unique PIN number printed on the side of your dispenser is the same number etched on each of the I-DOT™ microdots inside your dispenser. When you register your I-DOT™, follow the simple procedure described on the website I-DOT™ registration area, the PIN is stored together with your contact information and asset serial number on a secure database that can be accessed by the police 24 hours a day, 365 days a year. All it takes is one Toll free phone call from the police to re-unite you with your property.

PACK CONTENTS/PREPARATION

Please familiarize yourself with the I-DOT™ System components which are:

- 1 Dispenser of I-DOT™ microdots
- A selection of self-adhesive warning labels
- Instructions for use
- Instructions for online registration

PREPARATION

The I-DOT™ System is easy to use. Just follow these steps.

1. Your unique PIN is vital to the system and is needed to access the Traceline registry for Police & Authorities. This PIN number connects you to details which are held on a secure database only accessible to Police and Authorities.
2. Decide which property you are going to mark and where you are going to mark it. Make sure all surfaces are clean, dry and free from dirt, grease, polish and wax. If the article is not completely clean we recommend that each area to be marked is firstly cleaned with a rag soaked in mentholated spirits or some similar cleaning spirit. To make life impossible for the thief, hide most of the markings but leave some I-DOT™ microdots in obvious places that can be seen easily.

APPLICATION

USE THE ENCLOSED DISPENSER ONLY FOR HOUSEHOLD VALUABLES (SUCH AS ITEMS INSURED WITH HOME & CONTENTS INSURANCE)

Once a dispenser has been opened the contents should be used within two or three days.

If you do not use a full dispenser, replacing the cap tightly will help prevent premature thickening of the adhesive.

Store any unused dispensers out of reach of children and away from extreme temperatures.

MARKING CAPACITY

The contents of each dispenser will provide approximately 50-80 individual markings, depending on the surface and the way they are applied. This is sufficient to mark up to 30 typical household items.

Each wipe of the brush will leave a small dab of adhesive, containing any number of I-DOT™ microdots, on the surface of the component you wish to mark. The more widely and thoroughly you mark an item (multiple markings) the more effective the deterrent will be because it is virtually impossible for a thief to find all the I-DOT™ microdots.

MARKING PROPERTY IN THE HOME

Firstly, decide which items you wish to mark and make a list of them. Always select the largest and most valuable items first as they will probably require more markings than smaller or less valuable belongings. To make life impossible for the thief, hide most of the markings, but also leave some I-DOT™ microdots in obvious places such as around the manufacturers' brand name, model/serial number, labels, etc.

Once marking has been completed it is a good idea to make a record of the items for reference and keep it in a safe place in the event of theft or burglary, this information will be helpful in the unfortunate event that a theft occurs.

If you make a record of items that are marked it would be a good idea to include the following details:

- Item description (e.g. TV, painting, clock, golf clubs, computer, jewellery, etc.)
- Brand name/make
- Model Number
- Serial Number - if available
- Some of the marking locations

With I-DOT™ microdots, your assets are now protected by one of the most cost efficient and effective theft deterrents available. Remember to also lock up your home, close curtains and still insure your assets with home & contents insurance.

HOW TO APPLY I-DOT™ MICRODOTS

- Ensure that the top of the dispenser is tightly closed and shake it vigorously. Unscrew the top of the dispenser and withdraw the applicator brush. The brush will carry any number of I-DOT™ microdots which are often visible on the bristles.
- Wipe the brush gently on the surface of the component to be marked, revolving the cap and brush at the same time to ensure the I-DOT™ microdots are dispensed from the bristles. This will leave a small dab of adhesive containing the I-DOT™

microdot which will dry within 30 minutes.

- Several markings can be obtained from one brush full. To replenish the brush, replace the top, shake the dispenser again and repeat the process. Shake the pot regularly and continue to mark until the adhesive runs out.

WARNING LABELS! REGISTRATION! INSURANCE!

Your pack contains a selection of self-adhesive warning labels which clearly indicate that your property is “I-DOT™ PROTECTED” which could potentially deter thieves.

There are three different sizes (large/medium/small). The larger decals are used at the entry points (doors) or on glass (e.g. windows) near the front door. The others are for direct application to marked items. Use these at your discretion but please ensure that they are clearly visible (E.g. front of computer screen and hard drive).

Some items you apply I-DOT™ microdots to may be too small for warning labels, but you can still apply the microdots to these items such as jewellery and small ornaments of value (please apply to areas where the I-DOT™ won't show so as not to deface your property, such as on underside of item).

TRACELINE REGISTRATION

There is one way to register which is via our website @ www.csi-dots.com . Then click on I-DOT™ registration.

The downloadable Traceline Registration PDF document and instructions may be downloaded from www.csi-dots.com which also includes information on what action you need to take if you change address, sell a home asset or suffer a theft.

PRIVACY ACT

INFORMATION

Certified Secure Identification Corp and dealers acting on Certified Secure Identification Corp's behalf collect your personal information and information relating to the home assets you are purchasing through the dealer. After the secretly encoded identifier (I-DOT™), exclusive to you and your assets, are applied a permanent record is kept of your personal information. This information can be released to various Provincial and Federal authorities, underwriters, insurance investigators and insurance assessors to assist in the identification and recovery of the asset.

CONSENT

I agree that my personal information and the specification relating to the home assets being purchased can be recorded by you and can be released to the said authorities and others exclusively for the said purposes at any time and even though I am not then the current owner of the asset.

I appreciate and understand that Certified Secure Identification Corp will not control the use and further release of my personal information once the same is handed on to the said authorities and other people and that notwithstanding that lack of further control.

I agree and consent that Certified Secure Identification Corp can store and release my personal information at the request of the said authorities and/or other persons provided that Certified Secure Identification Corp information will be released exclusively for the purposes of identification and recovery of the said asset.
